Team Involvement in Demonstration

AI/ML and Generative AI Track • Project Documentation

Project	Trip Genius AI (VoyagePlan Travel Planner)	**Date**	26 October 2026
Submitted by	Kumkum Thakur (individual project)	**Hall Ticket No.**	0157CS241131
College	LNCTS	**University**	RGPV

Trip Genius AI is an **individual project**. All demonstration roles below are performed by the sole developer, Kumkum Thakur (Hall Ticket 0157CS241131).

Role	Responsibility during demo	Assigned member
Presenter / product overview	Explain user problem, objectives and main workflow	Kumkum Thakur
Frontend demonstrator	Navigate authentication, planner, itinerary and My Trips	Kumkum Thakur
Backend / AI explainer	Explain the FastAPI endpoint, validation and Groq integration	Kumkum Thakur
Database / security explainer	Explain Supabase authentication, persistence and row-level access	Kumkum Thakur
Deployment / QA support	Show hosting URLs, health check and test evidence	Kumkum Thakur

Contribution summary

- Product idea, requirement analysis and UI design.
- React + Vite frontend, navigation and state management.
- FastAPI backend, Pydantic schemas and Groq AI integration.
- Supabase authentication and saved-trip persistence.
- Deployment on Vercel and Render, CORS and environment configuration.
- Testing, troubleshooting and documentation.

Coordination guidelines

Agree on one demo flow in advance; avoid deployments immediately before the presentation; use a demo account; and clearly distinguish completed features from future scope.
